

Reviews Goodyear Vector 4Seasons Gen-2 165/65 R1

Has not seen it yet

Probably it is better on ice not to risk

I didn't realize, the rubber is very good

I haven't found it in 3 seasons

Most likely not for a strong inconvenience, I think it is better to put nails on ice

not for a hard winter

For the type of European winter, not for a severe all-terrain

Not for severe winters, I haven't tested it in mud during rain

Not for "negative" winters, not so much on the highway in rain

In winter I still use nails

I would like this quality and cheaper
